

What is ROKLive?

- ROKLive is a unique training experience focused on industrial digital transformation and designed for operational decision makers and implementers.
- ROKLive will feature a daily agenda of technical training and development sessions, hands-on labs, keynote presentations, a virtual tradeshow and the ability for attendees to network and collaborate with other peers, experts and presenters. Sessions will be presented by Rockwell Automation and members of the PartnerNetwork.
- ROKLive will also include the DX Strategists Conference, featuring keynote presentations and sessions specifically for digital transformation strategists, including operations, IT and engineering leadership.

When and where will ROKLive take place?

- **DATES:** ROKLive will take place June 10 – 19. The main event will happen on June 10. Hands-on labs will continue until June 19. Technical sessions and presentations will be available on-demand until Nov 2020. Hands-on labs will not be available on-demand.
- **LOCATION:** ROKLive is an online event. Attendees can log in from the comfort and safety of their own space and device.
- **TIME ZONE:** ROKLive sessions are scheduled in Central Daylight Time.

Who should attend ROKLive?

- Automation and Controls Engineers
- Operations, IT and Engineering leadership

Is there a cost to attend ROKLive?

- ROKLive is a complimentary event, however registration is required to attend.

How do I register to attend the ROKLive event?

- Registration is now available. To access the registration link, please visit the [ROKLive website](#). Registration is free but required to participate in ROKLive.

How do I login to ROKLive?

- Attendees registered prior to June 8th received an email with their login credentials on June 9th. Newly registered attendees will receive their login information via email after registering.
- Hands-on labs attendees will receive an email up to two hours prior to the start of their lab with login instructions.

Can I register to attend Hands-on Labs at ROKLive?

- Hands-on Labs registration has closed as of May 22. All the hands-on labs scheduled for ROKLive are at capacity and we are no longer accepting new registrations for the labs. We apologize for any inconvenience and thank you for your understanding.

Do I need specific equipment in order to participate in the Hands-on Labs?

- Hands-on Labs will be conducted via the Rockwell Automation Cloud Based Infrastructure (RACbi). You will connect to remote hardware for any hardware-based sessions. You do not need specific equipment to participate.

Do I need to register to attend Technical Sessions, Keynotes or the DX Strategists Conference?

- You do NOT need to register to attend the technical sessions, keynote presentations, or any DX Strategists Conference sessions.

Are Professional Development Hour credits available?

- Technical Sessions presented by Rockwell Automation are eligible for Professional Development Hour credits, including any accessed 'on-demand' from June 10 – November 2020. Hands-on Labs are not eligible for Professional Development Hour credits.
- You may access your PDH credits in "Your Profile" in the ROKLive event. They will be posted 24 hours after your session(s) end.

Will sessions be available on-demand?

- The ROKLive Technical Sessions and DX Strategists Conference presentations featured on June 10th will be available on-demand until November 2020, plus many other sessions! Registration is required to access the on-demand sessions.

Event dates and overall agenda

JUNE 10: ROKLive Experience

- DX Strategists focused keynotes and sessions for operations, IT and engineering leadership
- Technical training and development sessions for automation and controls engineers
- Interactive hands-on labs featuring the newest hardware and software technologies
- Presentations from the Rockwell Automation and members of the PartnerNetwork™
- Virtual exhibit hall
- Network and chat with experts, presenters and peers

JUNE 10-19: ROKLive Hands-on Labs

- 18 interactive labs offered each day, focused on the following areas:
 - Control
 - Digital Engineering
 - Information Solutions
 - Networks
 - Power, Motion and Motor Control
 - Process
 - Safety and Security
 - System
 - Visualization and Collaboration

Session categories/descriptions

DX Strategists Conference – June 10

Now, more than ever, innovation, creativity and agility are paramount for industry. At the DX Strategists Conference, we want to inspire innovation through shared experiences and community development. We're bringing together visionaries in industrial digital transformation at this new virtual conference.

The DX Strategists Conference is part of the complimentary ROKLive Virtual Event and is specifically designed for Operations, IT and Engineering leadership. Develop digital strategies that drive measurable results using disruptive technologies and creating agile business models that improve performance, optimize efficiency and reduce costs.

- Learn how to drive measurable business outcomes by hearing from industry leaders in interactive discussions
- Participate in presentations about strategy, team building, collaboration, security, and workforce enablement
- See how you can take advantage of the new business models being discovered through the use of emerging technologies

Technical Training and Development Sessions – June 10 and On-Demand

Get a first-hand experience with the latest technologies and applications. From control system design to data models, from edge to cloud, product managers will show you the newest innovations and discuss how you can take your strategy to the next level.

These sessions are designed specifically for automation and controls engineers.

ROKLive Hands-on Labs – June 10-19

Eighteen different hands-on labs will be offered daily, focused on the newest hardware and software technologies, in the following areas.

- Control
- Digital Engineering
- Information Solutions
- Networks
- Power, Motion and Motor Control
- Process
- Safety and Security
- System
- Visualization and Collaboration
